Charles Moquin, President
Permanent Finish Protection and Preservation
2356 Sweetbriar Lane
Rock Hill, SC 29732

Dear Charles

When you explained to me you had a product for my 2006 Sea Pro that negates the need of waxing the finish, I questioned it with legitimate concerns. Your honest demeanor enticed me to give you a chance in May of 2007. I must say, I'm happy that I did. Since the day you applied your special product my boat still looks new. I can honestly say your product had enhanced the original shine. Maintaining its finish has never been easier.

Those who saw my boat noticed the remarkable shine and asked me what type of wax I used. Gladly, I explained that the finish was not waxed but a special sealant was applied to protect and preserve its original finish without the need of waxing ever.

From my personal experience and observation I am convinced it makes good sense to protect a new finish using your product and stop wasting money having it restored, waxed only to be destroyed.

Thank you Charles for your professionalism. Today it's encouraging and appreciative to have an expert like you available to look out for those of us who are concern about keeping our craft new looking. You also used your product on my white 2007 Honda Accord Hybrid. I am totally convinced the result of the protected treatments have not only saved me money but also have extended the life of the finishes by many years.

It was a sincere pleasure and a rare privilege to do business with an individual of such high caliber and pride. Without question, I would recommend your professional services enthusiastically to all interested new owners.

Sincerely,

Fred Beckham, President
