Charles,

I purchased a new 24' Regal in the spring of 2003. I keep the boat at Kings Point Marina at Lake Norman. I had the boat on the work rack cleaning it sometime that summer. I noticed you applying your PPS Protectant System to a boat two or three racks down and was amazed at the sheen on that boat. Of course, I inquired about the product and process. Two weeks later you had made my boat look as good as the one I had seen earlier.

Almost 7 years later my boat looks just as good as when you first applied the product. The upkeep has been minimal.

Thank you for introducing me to your product and service.
