Dear Charles,

As you know, this year we had a "baby". It's a new Merlot Red BMW Z4! It means a lot to us and we are very cautious about who works on it. I was concerned with Florida weather and insect damage to our new car. We live in a condo without a garage. I did my homework and it all pointed to PPS technology. I had spoken to you and checked up on your references. I felt comfortable with your expertise. We made the decision.

It has been about 4 months since we had the pleasure of driving up to South Carolina to meet you and your lovely wife. We left our car with you for half a day and we picked up a much-enhanced vehicle. Ever since you applied the Never Wax PPS treatment the heads don't stop turning. The glossy, deep shine is obvious and captivates fans everywhere we go and its much less maintenance. I just hose the car down with a firm jet of water and loosen the tougher dirt with water and a soft mitt. Even a good rainstorm cleans it pretty well!

The trip was well worth it and ended up being a perfect excuse for a mini-vacation.

From your place we headed up to Ashville, NC to stay a night at the Inn on Biltmore Estate. As we drove up to the entrance everyone had to say something about our car's appearance. The entrance was packed with cars twice the price of ours, but all the eyes were on our car. Driving this glittering Z4 with the top down along the beautiful Carolina countryside is something I will never forget.

I highly recommend to anyone buying a new automobile to seal their cars finish with Never Wax PPS applied by a professional as you. Feel free to pass on my phone number to anyone that wishes to speak with me about my experience. Thanks for being a perfectionist and truly enhancing the beauty and longevity of our "baby's" finish.

Sincerely,

Luis Martell
