The Company You Keep®

Dear Charles,

I am always hesitant when ask to write a letter of recommendation, however, there are exceptions to any rule.

When I first learned of your product I ask myself, is this to good to be true? Well, after buying my RED 2007 Chevrolet 2500 crew cab truck, and paying over \$50k for it, as you well know I decided to give it a try. That has been over 2 years ago and low and behold my truck still to this day looks like it just rolled off the show room floor. I can only attribute this to your amazing product.

In addition to that your service is certainly second to none.

The caring professional way you handled things is impeccable. Pick up and delivery of my vehicle was exactly as you promised, and the manner of detail you show is awesome.

I have been so impressed with you and the product I used you again in my last purchase of an automobile for my wife, which she is equally impressed with. If you remember I had you do my secretary's new Honda accord, and may I add she is totally impressed with it. I have told many friends and clients about your services and some of them have used you as well.

When someone is making a purchase of an automobile it only makes sense to protect that purchase, and to stop wasting money on waxes and finishes that either are temporary or just don't work at all.

With best regards,

H. Wayne Helms, satisfied customer
